*** Notes of Significance ***																	
South Fork Zone consists of 3 fires on the Caribou-Targhee National Forest Black, Carrot, and Big Elk.																	

Evening Brief

Date/Time Stamp: Friday, August 26, 2016 - 10:49 PM

Weather Summary

Gradual warming and drying from west to east expected to begin Saturday with most areas seeing dry weather through Tuesday. Winds will shift to the west again by Friday across Nevada/Idaho and increase this weekend and especially next week.

Forecast models do indicate the potential for increasing SW winds over Nevada and into Idaho by later this weekend into early next week. Also a possible a return of dry lightning to Idaho by the middle of next week, while showers and wetter storms could return to southeast Utah.

Preparedness Levels

Current:

Great Basin	4
National	4

Great Basin Fire Activity: Light Initial Attack

New Fires and Acres: 10 fires for 76 acres / 2247 acres Large Fire Growth

Great Basin Fire Potential Summary

ERC's remain near or beyond the 97th percentile across a large portion of ID/western WY into far northern NV/UT. With ongoing fires in Idaho and western Wyoming into northern Utah there is the potential for significant growth still in the coming days as drier and warmer weather returns.

Moist conditions are expected to continue across southern portions of UT/NV and the Arizona Strip this week with drier weather returning region-wide this weekend into early next week.

A Fuel and Fire Behavior Advisory is also in effect for the Northern half of Nevada, Southern Idaho and Northwest Utah.

*** Please refer to our fuels page for more detailed information ***
